

About us

Neoscan Solutions is a young and cool venture. We are developing high-end solutions for MR imaging and spectroscopy, hereby collaborating closely with the Otto-von-Guericke University of Magdeburg, and the Research Campus *STIMULATE*.

About the position

Work student (m/f/d) for software development

Your tasks

- Conceptual design of graphical user interfaces
- Development and implementation of these interfaces in QML/C++
- Possibly also collaboration in other related projects

Your profile

- Studying computer science or a related subject
- Ability to develop versatile concepts.
- Basic knowledge in programming, ideally QML/C++
- Ideally, experience with GUI design
- Ability to work both independently and in a team.
- Good communication skills in German and English

Our Offer

- Flexible working hours
- Fair salary
- A collaborative atmosphere and real teamwork
- Modern production and office space
- Free drinks
- Free parking lot

Your Application

If you have a proactive, team-oriented way of working and are enthusiastic about GUI development and software development, we look forward to receiving your application by e-mail or post! Please send us your application documents (cover letter, CV, certificate of grades).
